

ABOUT US

With 40 years collective experience in the M&E industry Green Air's team of qualified engineers are focused on delivering a responsive, quality, client focused service (with a smile).

We are especially proud of our hands-on approach, promising communication and attention to detail throughout every step of the project. With no two jobs the same, we embrace the unique challenges each opportunity presents and work closely with clients and contractors to find practical solutions.

Above all, we are known for our professional and positive attitude. Our experienced team work with absolute confidence and have the ability to integrate seamlessly on site, working to specific guidelines, timescales and budgets.

SERVICES

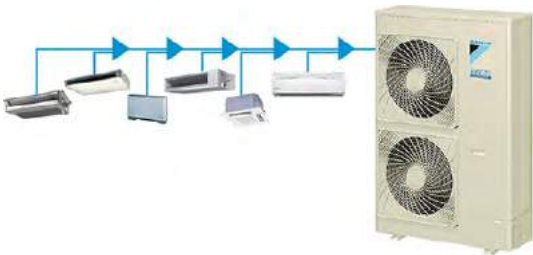

AIR CONDITIONING

Green Air work with you to survey, specify and install air conditioning systems to suit your needs.

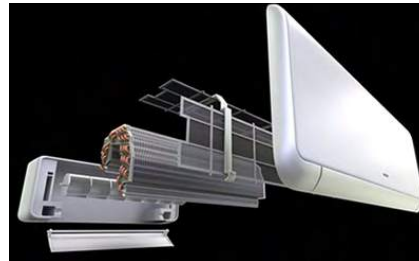

Our experienced team has worked across large-scale projects from hotels to commercial spaces, through to single-unit projects. Each job is handled with the same professional approach using qualified, friendly and tidy technicians.

HEATING & COOLING

VENTILATION & DUCTWORK

Green Air install commercial and industrial ventilation to maintain and regulate air movement within your building.

We can offer bespoke solutions for a standalone ventilation system or provide a solution to work with your existing framework.

DESIGN DETAILS

Green Air can assist with the planning and design of a space for M&E works, negating excessive design costs

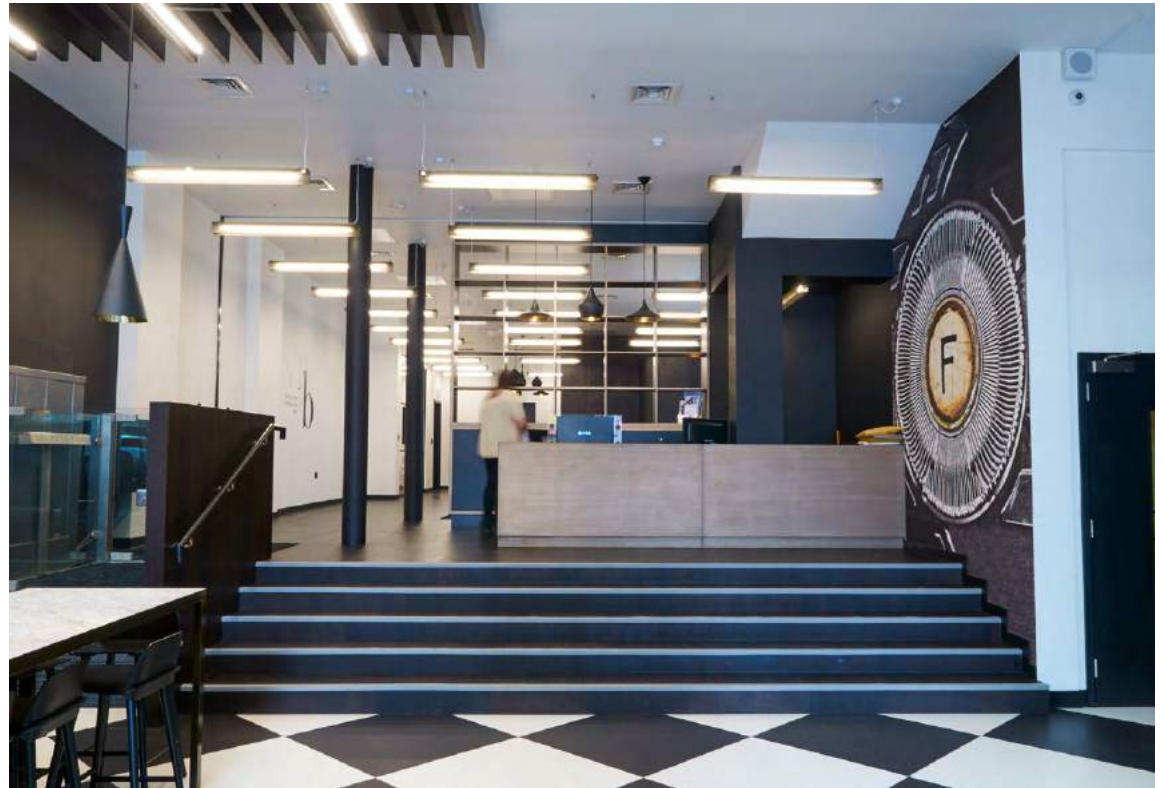

Our experienced Project Managers understand the importance of detailed drawings to outline a job, however, it is not always necessary to employ Mechanical and Electrical Consultants to do this for us. In many cases, we are able to support our contracts with sufficient design layouts that will help speed up communication and keep costs to a minimum.

ELECTRICAL

Green Air has a team of qualified electricians that can supply, install and project manage electrical works from bespoke builds to straightforward solutions.

Our services cover lighting, security and fire systems as well as LV systems and PAT testing. As expected, our team are compliant and up to date with the latest building and safety standards.

TESTIMONIALS

“Working with GA was a breath of fresh air compared to many of the other M & E companies out there. They have a great attitude towards their work and that sets them apart”.

Simon Mockeridge, Featherstone Consultants

“The team from GA worked exceptionally well with the other contractors on site; this cooperation is essential for the project to run smoothly”.

Simon Strama, Site Manager

“We found Green Air to be knowledgeable, approachable and happy to assist and advise. We gained confidence in their abilities and professionalism, which resulted in us collaborating on client meetings with our project management teams”.

Brett Simpson, Managing Director, GID

“I have worked with Lee McCarthy, Green Air, on various Cat A and end-user projects involving the design and installation of systems from small Comm Rooms to multi-floor buildings incorporating VRF, Chiller and Ventilation works. Generally all projects have had tight time constraints and we needed their flexibility and knowledge to meet these timescales, the Clients requirements and budgets. I will continue to work with Lee and would happily recommend his company.”
